

Changing battery on a Multi-Purpose Controller

Warning!

Changing the battery of the Multi-Purpose Controller (MPC) may cause a reset and restart of the MPC. Therefore, only change the battery while:

- ship is in harbour with engine stopped, or
- when sailing in unrestricted areas, where a restart of an MPC does not imply any risk for the ship or the engine.

The battery only serves as back-up supply for the built-in clock of the MPC, and a low battery level for several days until entering port is of no consequence to the safe operation of the engine.
